

## Daimler Landalet with “Confetti Cloud” ®

A relatively new acquisition to our wedding fleet, this beautiful silver-on-grey classic Daimler DS420 has been converted so that the entire back of the vehicle can be opened to show the bride and her entourage at their best throughout your happy day.

Finished to a superb standard, with grey leather and walnut interior, our Daimler Landalet can carry up to 7 passengers, including children. This is the perfect car to accommodate the bride, her consort and the bridesmaids, transporting them to the wedding in Royal luxury, before whisking the new husband and wife team and both sets of parents, to the reception afterwards.

A particularly unique feature on this vehicle is the *Confetti Cloud* ® arrangement that blasts a shower of fire-retardant and biodegradable, multi-coloured, confetti strips 30 feet into the air. There are two compressed air “cannon” built into the rear shelf and, on the flick of a switch, the driver can give you, and your wedding guests, the most fantastic photo-opportunity that you will treasure for the rest of your lives. This vehicle is the only one of its kind available in Swansea and offers a genuinely spectacular *Wow-factor* that will help make your event go with a Bang!

Although our brand new *Confetti Cloud* ® is weather dependant, we also have a hand-held version \*, which although is not quite so powerful, will compensate for the typical British weather and still raise a smile to the lips of everyone in attendance.

\* Manufactured in accordance with NEN-EN-ISO 6941

*This is not the actual vehicle owned by us and this image is used only to illustrate the Confetti Cloud concept*
